SUMMARY

Flutter Developer with 3+ years of experience designing and shipping production-grade, cross-platform mobile applications for international clients across diverse industries. Proficient in Dart, Flutter, and scalable architectures (MVVM, Clean Architecture) with hands-on expertise in Firebase, Node.js, REST APIs, Stripe payment integration, and CI/CD pipelines. Delivered a range of complex projects including a live marketplace app with thousands of active users, a healthcare productivity tool published on the App Store, and multiple social, chat, and e-commerce applications.

SKILLS

Languages & Frameworks: Dart, Flutter	State Management: Provider, Bloc, GetX
Backend & Storage: Firebase, Node.js, REST APIs, Hive	Architectures: MVVM, MVC, Clean Architecture
Tools: VSCode, Android Studio, Figma, Postman, GitHub	Other: Stripe, Push Notifications, CI/CD, Chatbots, Payment Gateways

EDUCATION

BS Computer Science Agriculture University Peshawar	CGPA: 3.07 2022 – 2026
FSc Government College Peshawar	78.2% 2021

EXPERIENCE

Flutter Developer (Intern) | Encoder Bytes Oct 2023 – Mar 2024

- Revamped the mobile frontend using Flutter and GetX, achieving a 75% increase in user growth rate and doubling average session retention time.
- Resolved critical UI rendering glitches and page load bottlenecks, delivering a significantly smoother cross-device user experience.
- Integrated Firebase (Firestore, Firebase Auth) to strengthen CRUD operations and user database management across the platform.

Flutter Developer | TriTech Solutions Apr 2024 – Present

- Lead end-to-end development of production Flutter applications for clients across multiple domains, applying MVVM Clean Architecture to deliver scalable and maintainable codebases.
- Delivered complex integrations including Stripe payment gateways, push notification systems, RESTful APIs, and AI-powered chatbot modules.
- Managed multiple state management solutions (GetX, Provider, Bloc) based on project complexity; maintained CI/CD pipelines and co-ordinated workflows via GitHub, Figma, and Postman.

PROJECTS

ChiroSimple – Chiropractic Business App [App Store](#)

- Built a Flutter-based chiropractic practice management app (rated 5.0 on App Store) enabling practitioners to manage patient records, appointments, and SOAP notes all with offline access.
- Implemented quick-click note creation tools, calendar reminders, and one-click record access, reducing practitioner paperwork time significantly.
- Architected offline-first data sync using local storage with seamless cloud backup, ensuring uninterrupted workflow in lowconnectivity environments.

Tamayaz – GCC Marketplace App [Play Store](#)

- Developed a full-stack Flutter + Node.js marketplace for buying and selling cars, premium license plates, and mobile numbers across GCC, trusted by thousands of active users.
- Integrated Stripe payment gateway, real-time push notifications, direct buyer-seller messaging, and personalized listing alerts.

POSITION OF RESPONSIBILITY

Flutter Developer | GDSC, City University Peshawar Nov 2023 – Present

- Supported and guided fellow developers on Flutter-based projects, facilitating the adoption of industry-standard state management solutions and architectural best practices.
